

HEADLIGHT RESTORATION SERVICE

Cloudy and yellowed headlights are the result of time and exposure to the sun's UV rays, which causes the protective coating on new headlights to wear off, leaving the polycarbonate plastic exposed to environmental and road hazards.

Not only are faded, yellowed or cloudy headlights unsafe and costly to replace, but according to the Department of Highway Safety, they can cut nighttime visibility by as much as 50%. Renew your headlights' protective finish with UAP's Ultimate Headlight Restore for superior lasting strength against scratches, chemicals, and road debris for years to come.
